

Innovative Dive Equipment Inc.

**EL-A 98 Degree, 9/16-18 Male to AGA Female**

**This adaptor allows a standard US low pressure regulator hose to be used with the Interspiro Divator MK II (AGA) Full Face Mask. In addition, the adaptor provides a 98 degree angle at the point it attaches to the MK II second stage. This is an important feature for Public Safety/Military divers who usually route their low pressure hose down to a manifold block. This also decreases the chance for entanglement by placing the hose in close to the diver.**

**\*\*\*\*MSRP for this adaptor is \$49.99\*\*\*\***

**Our Low Price \$45.00**

**This adaptor is new, and is manufactured by “OmniSwivel International”. It is constructed from solid brass, and protected with an "Electroless Nickel Plating".**
